Jump-Starting a Vehicle

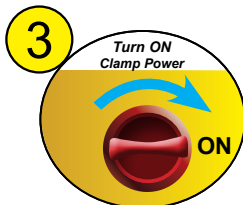

⚠WARNING

To prevent serious injury:

1. Do not touch positive and negative battery clamps together.
2. Do not connect to the negative terminal of the battery.

CONNECT RED POSITIVE CLAMP FIRST, THEN
CONNECT BLACK NEGATIVE CLAMP TO A
NON-MOVING METAL PART OF THE VEHICLE.

Wait 5 minutes!

AFTER TURNING
CLAMP POWER ON,
wait 5 minutes before
starting ignition.
THE VEHICLE WILL NOT
START IF YOU DON'T
WAIT 5 MINUTES!

After the vehicle is started:

1. Turn OFF the Clamp Power.
2. Remove the Black Negative Clamp.
3. Remove the Red Positive Clamp.

⚠WARNING

This Quick Start Guide is not intended to replace the Owner's Manual & Safety Instructions. Read all safety warnings and instructions therein to ensure proper usage and to avoid personal injury.

Using the Air Compressor

Open Air Hose Compartment on the back of the unit and pull out the air hose.

Note: Pull shipping tab out of switch before first use.

1

Position the Tire Inflator over the valve stem and push down firmly. Press down on the lever.

2

Turn ON Compressor
OFF ON

3

Monitor the Air Pressure Gauge until the proper inflation level has been reached.

4

Turn OFF Compressor
OFF ON

Three adapters are included with the Power Pack that can be attached to the Tire Inflator.

Attach the proper adapter, then follow steps 2-4 above.

⚠ WARNING

To prevent serious injury:

1. Check the proper inflation level of the object being inflated.
2. Monitor the Air Pressure Gauge on the front of the Power Pack.
3. Do not overinflate.

Running/Charging DC Appliances
