## Quick Start Guide

- 1 Close Regulator and Drain Valve.
- 2 Plug Cord directly into wall.  
Extension cord not recommended,  
use longer hose instead. See manual.
- 3 Turn unit on.
- 4 Connect Hose and adjust Regulator.

**Note:** After turning off unit, wait 15 seconds before turning back on.

**Note:** This unit is equipped with Thermal Overload Protection.  
If unit does not start, unplug it for 30 minutes  
before plugging it back in.

**Note:** It is normal for pressure relief valve to expel  
air during and immediately after operation.
