WARNING SYMBOLS AND DEFINITIONS

⚠️ DANGER
Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

⚠️ WARNING
Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ CAUTION
Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE
Addresses practices not related to personal injury.

IMPORTANT SAFETY INFORMATION

⚠️ WARNING
Read all safety warnings and instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. Save all warnings and instructions for future reference.

2. Observe installation area conditions. Keep work area well lit during installation.
3. Check for damaged parts. Before using any product, any part that appears damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for any broken or damaged parts and any other conditions that may affect its operation. Replace or repair damaged or worn parts immediately. Do not use the Security Light if any switch does not turn on and off properly.
4. Replacement parts and accessories. When servicing, use only identical replacement parts. Use of any other parts will void the warranty.
5. Check hardware and assembled parts after assembling. All connections should be tight and hardware tightened.

Page 2
7. **Dress properly.** Protective, electrically non-conductive clothes and nonskid footwear are recommended when working with the Solar Powered Security Light. Wear restrictive hair covering to contain long hair.

8. **Use eye protection.** Wear ANSI-approved impact safety goggles when setting up this product.

9. **Maintain products with care.** Keep the Solar Powered Security Light clean for better and safer performance. Inspect the Light periodically. If damaged, have it repaired by a qualified technician.

10. **Do not overreach.** Keep proper footing and balance at all times. If a ladder is to be used during installation, it should be supported by an assistant.

11. **Do not set up the Solar Powered Security Light if under the influence of alcohol or drugs.** Read warning labels on prescriptions to determine if your judgement or reflexes are impaired while taking drugs. If there is any doubt, do not set up the Light.

12. **NiCd BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY.** Do not short, incinerate or open battery.

13. **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

14. **WARNING: Handling the cord on this product’s Charger will expose you to lead, a chemical known to the State of California to cause cancer, and birth defects or other reproductive harm. Wash hands after handling.** (California Health & Safety Code § 25249.5, et seq.)

15. The warnings, precautions, and instructions discussed in this instruction manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

Setup - Before Use:

Read the ENTIRE IMPORTANT SAFETY INFORMATION section at the beginning of this manual including all text under subheadings therein before set up or use of this product.

Note: For additional information regarding the parts listed in the following pages, refer to Parts List and Diagram on page 10.

Installation

1. Decide where you want to place the Lamp and the Solar Panel. The Solar Panel is equipped with a 16 ft. connecting wire, so the Lamp and Solar Panel can be installed up to 16 ft. apart. **The Solar Panel must be set in a location that receives full, direct sunlight, a minimum of eight hours a day. Ideally, the solar panel should be angled slightly toward the south (northern hemisphere).**

2. Mount the Solar Panel:
   a. Place the Solar Panel in the desired location, adjusting the unit to best fit the surface.
   b. Mark the hole locations of the Base, then set the Solar Panel aside.
   c. Check that the marked areas are clear of obstacles such as cables and electrical lines. Drill holes for the enclosed Screws and plastic Anchors.
   d. Insert the plastic Anchors then secure the Solar Panel in place with the screws.

3. Mount the Lamp:
   a. Locate the unit six to eight feet above ground on a solid surface capable of supporting the Lamp and secure enough so that it will not move when exposed to vibrations or wind. The unit must be high enough to allow for motion detection and light distribution.
   b. Mark the hole locations of the Mounting Bracket, then set the Lamp aside.
   c. Check that the marked areas are clear of obstacles such as cables and electrical lines. Drill holes for the enclosed Screws.
   d. Secure the Lamp in place with the screws.

4. Carefully route the Power Cord of the Solar Panel to the Lamp and plug it into the Battery Housing Outlet on the back of the Battery Housing.

5. Loosen the Detector Angle Lock, swivel the Motion Detector Head so that it faces the area where movement will occur, and tighten the Detector Angle Lock.
Functions

For technical questions, please call 1-800-444-3353.
Operating Instructions

Read the ENTIRE IMPORTANT SAFETY INFORMATION section at the beginning of this manual including all text under subheadings therein before set up or use of this product.

Initial Battery Charging

Before the Security Light can operate properly, the batteries need to be fully charged. To charge the batteries:

1. Turn OFF the Power Switch.

2. ALLOW 3 DAYS OF FULL SUNLIGHT
to fully charge the batteries.

3. After charging, turn the Power Switch Auto. The light will illuminate for a short time when first switched on. This indicates that it is working properly.

Power Switch

The Power Switch, located under the Battery Housing of the Lamp has three settings:

OFF: Center position.

ON: Towards the Lamp. The lamp stays on functioning as a normal light.

AUTO: Away from the Lamp. The light will turn on automatically when motion is detected by the Motion Sensor Head.

Motion Detector Control Knobs

The Solar Powered Security Light has 3 different Control Knobs on the underside of the Motion Detector Head. They control the Motion Detector Head’s sensor. They are sensitivity to light (LUX), the light’s duration (TIME) and the sensor’s sensitivity to motion (SENS).

NOTE: After each adjustment, walk the detection area to check the adjustment just made.
Motion Detector Control Knobs (cont.)

**LUX (Light Level)**

The LUX Adjusting Knob (9) tells the sensor the level of darkness that must be reached before the Light turns on.

**Note:** If the Security Light is not operating at night due to interference from a street light or other interference, turn the LUX knob towards the maximum setting (⁻). Adjust the dial as needed between the minimum and maximum settings to achieve the desired level of sensitivity.

**TIME (Light Duration)**

The TIME Adjusting Knob (11) sets how long the Light stays lit after motion is no longer detected by the sensor.

The TIME is adjustable from 5 seconds to 2 minutes.

**Minimum Position**

Turning the dial counterclockwise to the minimum setting lowers the sensor level. The sensor will only trigger the light to turn on at dusk or when it is dark out. **This is the ideal position for general evening and night operation.**

**Maximum Position**

Turning the dial clockwise to the maximum setting increases the sensor level. The light will go on in most situations ranging from dark to daylight.

**Minimum Position**

Turn the dial counterclockwise to the minimum for the light to stay on for 5 seconds after motion is no longer detected.

**Mid Range**

Adjusting the dial between the Minimum and Maximum to choose any time between 5 seconds and 2 minutes for the light to stay on after motion is no longer detected.

**Maximum Position**

Turn the dial clockwise to the maximum for the light to stay on for 2 minutes after motion is no longer detected.
Motion Detector Control Knobs (cont.)

SENS (Sensitivity)

The SENS Adjusting Knob (10) sets the level of sensitivity of the Motion Detector Head.

The Motion Detector Head is most sensitive to movement across the detection zone, rather than movement toward or away from the Motion Detector Head (6).

Movement is best detected at a distance of 40 feet or less.

**Note:** Turn the dial anywhere between the minimum and maximum settings to adjust the level of sensitivity, as needed.

Testing the Light

After the battery is charged and the control knobs are set, walk slowly around the detection area. The sensor detects infrared radiation given off by a person or animal. This triggers the Light to turn on. The Light should go on in the area that you set up the Security Light to monitor. Adjust the knobs and sensor and re-test until the unit functions as desired. Repeat the test procedure as needed when there are weather and/or temperature changes.

Sensitivity is affected by the ambient air temperature. If it is hot outside, the sensor has difficulty detecting changes in heat. In cold temperatures, the sensitivity is increased and may need to be adjusted.

**Minimum Position**

Turn the dial counterclockwise to the minimum setting. Ideal for cold winter conditions or when nuisance tripping is a problem. If the light is activated by small animals or rapid changes in heat, the sensitivity can be reduced by turning the knob counterclockwise towards the minimum setting (“-”).

**Maximum Position**

Turn the dial clockwise to the maximum setting. Ideal for hot summer conditions or to maximize range.

**note:** Turn the dial anywhere between the minimum and maximum settings to adjust the level of sensitivity, as needed.
Maintenance and Servicing

Procedures not specifically explained in this manual must be performed only by a qualified technician.

**WARNING**

TO PREVENT SERIOUS INJURY FROM TOOL FAILURE:
Do not use damaged equipment. If abnormal noise or vibration occurs, have the problem corrected before further use.

Cleaning, Maintenance, and Lubrication

1. **BEFORE EACH USE**, inspect the general condition of the tool. Check for:
   - leaking, swollen, or cracked battery pack,
   - loose hardware,
   - misalignment or binding of parts,
   - cracked or broken parts, and
   - any other condition that may affect its safe operation.

2. **AFTER USE**, wipe external surfaces of the tool with clean cloth.

3. NiCd BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY. Do not short, incinerate or open battery.

Troubleshooting

Limited 90 Day Warranty

Harbor Freight Tools Co. makes every effort to assure that its products meet high quality and durability standards, and warrants to the original purchaser that this product is free from defects in materials and workmanship for the period of 90 days from the date of purchase. This warranty does not apply to damage due directly or indirectly, to misuse, abuse, negligence or accidents, repairs or alterations outside our facilities, criminal activity, improper installation, normal wear and tear, or to lack of maintenance. We shall in no event be liable for death, injuries to persons or property, or for incidental, contingent, special or consequential damages arising from the use of our product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation of exclusion may not apply to you. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.

To take advantage of this warranty, the product or part must be returned to us with transportation charges prepaid. Proof of purchase date and an explanation of the complaint must accompany the merchandise. If our inspection verifies the defect, we will either repair or replace the product at our election or we may elect to refund the purchase price if we cannot readily and quickly provide you with a replacement. We will return repaired products at our expense, but if we determine there is no defect, or that the defect resulted from causes not within the scope of our warranty, then you must bear the cost of returning the product.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.
