2. HAZARDS IDENTIFICATION

2.1 Hazard Identification:

This product is classified as a HAZARDOUS SUBSTANCE and as DANGEROUS GOODS according to the classification criteria of NOHSC: 1008 (2004) and ADG Code (Australia).

IF THE FILTER DOES NOT IMMEDIATELY DARKEN AFTER STRIKING AN ARC, CEASE USING. INSPECT BEFORE USE. IF ANY PART IS LOOSE OR IS DAMAGED, DO NOT USE.

If handled properly, there are no known serious health risks. Inhalation, absorption & ingestion are unlikely under normal conditions as the battery is hermetically sealed within the device. However, if device is crushed, or compromised in a fire, contact with the lithium metal battery and material may cause damage to eyes & skin tissue as well as the nose, throat, lungs & respiratory tract if inhaled. Please strictly observe safety instructions.

The following statements apply to the contents of the lithium metal battery if it has been compromised (e.g., opened, crushed, punctured). These statements do not apply to the hermetically sealed device which has not been damaged or compromised.

DANGER! IN CONTACT WITH WATER RELEASES FLAMMABLE GASES WHICH MAY IGNITE SPONTANEOUSLY. CAUSES SEVERE SKIN BURNS AND EYE DAMAGE. MAY BE HARMFUL IF SWALLOWED.

<u>Hazard Statements</u> (H): H260 - In contact with water releases flammable gases which may ignite spontaneously. H314 - Causes severe skin burns and eye damage. EU014 – Reacts violently with water.

<u>Precautionary Statements</u> (P): P223 – Keep away from any possible contact with water, because of violent reaction and possible flash fire. P264 – Wash hands and exposed skin surfaces thoroughly with warm water and soap after handling. P280 – Wear protective gloves/eye protection/face protection. P301+P330+P331 – IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. P310 – Immediately call a Poison Control Center or doctor/physician. P370+P378 – In case of fire: Use Lith-X powder, Class D fire extinguisher, Dry Lithium Chloride, or Graphite Powder for extinction. P402+P404 – Store in a dry place. Store in a closed container. P501 – Dispose of contents through a licensed treatment, storage, disposal facility (TSDF).

Prepared to OSHA, ACC, ANSI, NOHSC, WHMIS, 2001/58 & 1272/2008/EC Standards SDS Revision Date: 5/12/2015 6. ACCIDENTAL RELEASE MEASURES 6.1 Spills: None under normal conditions. If the contents leak, observe the following instructions: Secure spill area and maximize ventilation. Stop spill or leak at source if safely possible. Deny entry to all unprotected individuals. Individuals involved in the cleanup must wear appropriate personal protective equipment to avoid breathing vapors or touching liquid. Recover or cover with inert absorbent material and place into appropriate container(s) for disposal. If in water remove if safe to do so. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers or any natural waterway or drinking supply. Spills are unlikely as the battery is enclosed hermetically sealed device. 7. HANDLING & STORAGE INFORMATION 7.1 Work & Hygiene Practices: DO NOT swallow, apply excessive force to the positive terminal, drop, weld the terminal or wire to the body of the battery directly, short-circuit the battery, charge, forcibly discharge, heat, expose to open flame, disassemble, reverse the positive and negative terminals when mounting, use different batteries together, touch any liquid that leaks from the battery, or hold the battery for an extended period. 7.2 Storage & Handling: Keep battery away from water. Never store in hot or very humid place. Storage and handling areas should be equipped with proper containment to capture and neutralize spills. 7.3 Special Precautions: Do not expose to excessive physical shock or vibration. Storage and use areas should be equipped with eyewash stations and safety showers. 8. Upon completion of work activities involving large quantities of this product (fluid), wash any exposed areas thoroughly with soap and water 8.3 Respiratory Protection: No special respiratory protection is required under typical circumstances of use or handling. In instances where mist or vapors of this product are generated, and respiratory protection is needed, use only protection authorized by 29 CFR §1910.134, applicable U.S. State regulations, or the Canadian CAS Standard Z94.4-93 and applicable standards of Canadian Provinces, EC member Avoid eye contact. Wear protective eyewear (e.g., safety glasses with side-shield) at all times when 8.4 Eye Protection: handling this product. Contact lenses pose a special hazard; soft lenses may absorb and concentrate irritants. Have suitable eye wash water available. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Hand Protection: 8.5 Use gloves constructed of chemical-resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. If necessary, refer to U.S. OSHA 29 CFR §1910.138, the appropriate standards of Canada, or the EU member states. Do not wear rings, watches or jewelry that could entrap the material against the skin. No apron required when handling sealed undamaged battery. Where contact is likely corrosive-8.6 Body Protection: resistant apron, clothing and boots. Protective clothing, if used, should include long-sleeves, apron, boots and additional facial protection.
